CIRCUIT THEORY AND APPLICATIONS, VOL. 1, 411–413 (1973)

# CONTENTS

Volume 1, Issue Nos. 1–4
International Journal of

CIRCUIT THEORY AND APPLICATIONS

*Issue No.* 1, March 1973

Editorial . . . . . 3

A. Sedlmeyer and A. Fettweis: Digital Filters with True Ladder Configuration . . . . . 5

S. N. Hazra and S. C. Dutta Roy: A Simple Design of Linear-Phase, Low-Pass, Recursive Digital Filters . . . . . 11

V. Belevitch: On the Realizability of Non-Rational Positive Real Functions . . . . . 17

D. G. Lampard: Inhomogeneous Ladder Networks, Part 1 . . . . . 31

J. Kudrewicz: The Describing Function Method and Free Vibrations in Nonlinear Systems . . 49

D. C. Youla, J. D. Rhodes and P. C. Marston: Recent Developments in the Synthesis of a Class of Lumped-Distributed Filters . . . . . 59

L. T. Bruton and R. T. Pederson: A Frequency-Locked Adaptive Filter . . . . . 71

SHORT COMMUNICATIONS

P. P. Civalleri: The Active Line Problem; On the Existence and Uniqueness of the Response of the Infinite Active Line . . . . . 83

M. Lal and N. C. Jain: Realization of *n*-Port Resistance Matrices . . . . . 89

I. Shirakawa, H. Ozaki and A. Togawa: Block-Pivoted Condensation on Impedance Matrices. 93

N. Fliege: Sallen and Key-Type RC-Active Filters with Complex Transmission Zeros . . 99

*Issue No.* 2, June 1973

S. K. Mullick: Synthesis of a Nonlinear Filter for FM Demodulation . . . . . 107

R. A. Stein: RC Admittance Realization by Grounded-Capacitor Structures . . . . . 119

M. Valtonen: Synthesis of a Useful Class of Transmission Line Networks . . . . . 127

M. C. Van Lier and R. H. J. Otten: On the Mathematical Formulation of the Wiring Problem . 137

*R. Unbehauen: Approximation of a Phase Characteristic by the Transfer-Function of a Digital Filter* . . . . . 149

T. E. Rozzi: Network Analysis of Strongly Coupled Transverse Apertures in Waveguide . . 161

V. Belevitch and C. Wellekens: Internal Equalization in Filters. . . . . 179

SHORT COMMUNICATIONS

A. F. Arbel: *Identification of the Return Difference Matrix of a Multivariable Linear Control System, in Terms of its Inverse Closed-Loop Transfer Matrix* . . . . . 187

A. F. Arbel: Return Ratio and Sensitivity Computation for Multivariable Control Systems and Feedback-Stabilized Multiple Amplifier Active Circuits . . . . . 191

J. Solymosi: Synthesis of Immittances with Real, Single Poles and Arbitrary Zeros . . . 201

W. E. Smith: Application of an Extended Maximum Modulus Principle to Minimum-Energy-*Storage Multiresistor Realizations of an Impedance* . . . . . 205

A. D. Fialkow: On RLC Network Matrices . . . . . 209

*Issue No.* 3, September 1973

*A. K. Seth and P. H. Roe: Higher Derivative Network Sensitivities Using Adjoint Network* . 215

L. Gruner: Applications of the Discrete Green's Function Concept in Circuit Theory . . . 227

K. Singhal, J. Vlach and P. R. Bryant: Efficient Computation of Large Change Multiparameter *Sensitivity* . . . . . 237

T. B. M. Neill and D. J. Bond: Inversion of the Nodal Admittance Matrix by the Use of State Equations . . . . . 249

*K. Szendy: A Synthesis Method for Power Network Extension* . . . . . 263

T. Roska and J. Klimó: On the Solvability of DC Equations and the Implicit Integration Formula 273

L. Bálint: Modeling of Coupled Multiconductor Microstrip-like Transmission Lines . . . 281

SHORT COMMUNICATIONS

A. M. Soliman: Two Active RC Configurations for Realizing Nonminimum Phase Transfer Functions . . . . . 293

Y. K. Sirkeinen: The Allowed Varactor Parameter Tolerances for the Electrical Tunability of Two Microstrip Parametric Amplifiers . . . . . 301

S. S. Haykin: Gain-Phase Analysis of Digital Filters with Applications. . . . . 305

*Issue No.* 4, December 1973

J. Gensel, R. Meissner and V. Seidel: An Active RC Filter for PCM Systems . . . . . 315

A. Fettweis: Reciprocity, Inter-Reciprocity, and Transposition in Wave Digital Filters . . . 323

L. Kittel: New General Approach to Commensurate TEM Transmission Line Networks Using State Space Techniques . . . . . 339

J. D. Rhodes: Fourier Coefficient Design of Stepped Impedance Transmission Line Networks . 363

R. Orfei and G. V. Pallotino: Networks Containing Periodically Operated Switches: A State Space Approach . . . . . 373

SHORT COMMUNICATIONS

N. D. Kenyon: Single-Tuned Solid State Microwave Oscillators . . . . . 387

S. Rízek: A Method of Graphical Approximation in Synthesis of RC Distributed Networks . 395

D. E. Johnson and J. R. Johnson: On Enumerating the Trees of a Ladder Network . . . 401

Table of Contents, Volume 1 . . . . . 411

Author Index . . . . . 415

CIRCUIT THEORY AND APPLICATIONS, VOL. 1, 415–416 (1973)

# AUTHOR INDEX, VOLUME 1

Arbel, A. F.: Identification of the return difference matrix of a multivariable linear control system, in terms of its inverse closed-loop transfer matrix, 187; Return ratio and sensitivity computation for multivariable control systems and feedback-stabilized multiple amplifier active circuits, 191

Bálint, L.: Modeling of coupled multiconductor microstrip-like transmission lines, 281

Belevitch, V.: On the realizability of non-rational positive real functions, 17

Belevitch, V., and Wellekens, C.: Internal equalization in filters, 179

Bond, D. J., see Neill, T. B. M., 249
